SUMMARY

AIDS Drug Assistance Programs (ADAPs), a component of the Ryan White Program, are the nation's prescription drug safety-net for people living with HIV (PLWH), serving primarily low-income, people of color who have limited or no access to life-saving medications. ADAPs provide antiretroviral (ARV) medications, a critical component of HIV care today, to PLWH who would otherwise fall through the cracks in the larger U.S. health care system. ADAPs serve approximately one-quarter of all PLWH who are in care and delicately balance available program capacity and funding with client demand. As the number of PLWH in the U.S. has increased, largely due to advances in HIV treatment and increased HIV testing, the reliance on the Ryan White Program, and ADAPs specifically, has grown over time. The purpose of ADAPs, as stated in Ryan White program legislation, is to:

... provide therapeutics to treat HIV disease or prevent the serious deterioration of health arising from HIV disease in eligible individuals, including measures for the prevention and treatment of opportunistic infections ...

ADAPs accomplish this purpose through two main activities: by providing FDA-approved HIV and HIV-related prescription drugs and by paying for health insurance that includes HIV and HIV-related treatments. The predecessor to ADAPs began serving clients in

1987, when Congress first appropriated funds to help states purchase AZT, the only FDA-approved HIV antiretroviral drug at that time. In 1990, these federally-funded, state administered "AZT Assistance Programs" were incorporated into the newly created Ryan White Program under Title II (grants to states, now known as "Part B"). AZT Assistance Programs became a distinct component of the Ryan White Program in 1996, when they were introduced as "AIDS Drug Assistance Programs," or ADAPs, as a component of Title II (now Part B) of the Ryan White CARE Act (now the Ryan White Program). The Ryan White Program is the nation's third largest source of federal funding for HIV care and treatment, after Medicaid and Medicare.

Like all Parts of the Ryan White Program, ADAPs serve as "payer of last resort;" that is, they provide medications to, or pay for health insurance for, PLWH when no other coverage source or funding is available to do so. Since the inception of ADAP, there have been significant shifts in funding and client need. ADAPs continually seek to identify how they can meet client need and ensure program sustainability. At a time when ADAPs are able to document program stability, it is imperative that ADAP look back on how challenges were resolved and look ahead at client needs and determine ways to prepare for the future. ADAPs are at an unprecedented juncture of being able to target resources for populations that need them most, to partner with Ryan White Part B programs to ensure that the whole client's needs are met, and to identify ways to bolster treatment to improve individual's health. **SECTION**

ONE

THE IMPORTANCE OF THE RYAN WHITE PROGRAM AND ADAP

OVERVIEW OF THE RYAN WHITE PROGRAM AND ADAP

The Ryan White HIV Program (Ryan White Program), comprised of five "Parts," provides comprehensive care to eligible clients with the majority of funding allocated to medical care and support services. The Ryan White Program received \$2.3 billion in federal funding in federal fiscal year (FY) 2016. Part B of the Ryan White Program focuses grant funding to states and territories to provide <u>29 core</u> medical and support services, including ADAP. ADAP was introduced as a line item in Title II (now Part B) of the Ryan White Program appropriation in 1996. The introduction of ADAP offered access to HIV antiretroviral (ARV) medications for low-income, under- and un-insured individuals. The Ryan White Program, including ADAP, is available in all 50 states, the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, American Samoa, the Federated States of Micronesia, Guam, the Northern Mariana Islands, Republic of Palau, and the Republic of the Marshall Islands.

RYAN WHITE

Ryan White was diagnosed with HIV following a blood transfusion in 1984. He was 13 years old at the time. Following his diagnosis, Ryan was barred from his Indiana school and became a "national hero" because of his fight to return to school. Ryan fought discrimination and stigma and became the face of public education about HIV and AIDS. Ryan White died in April 1990, months before the legislation bearing his name was passed.

FUNDING THE RYAN WHITE PROGRAM

Funding for the Ryan White Program is appropriated annually by Congress. The Health Resources and Services Administration's HIV/ AIDS Bureau (HRSA/HAB) administers the Ryan White Program and provides appropriated funding to states based on a formula and eligibility-based distribution mechanism. ADAPs are funded as a component part of the overall Part B program and are eligible to apply to receive three categories of funding: ADAP Earmark, ADAP supplemental drug treatment grants, and ADAP emergency relief funding. In FY2016, the Congressionally appropriated contribution to ADAP was \$897.1 million. Based on local state and metropolitan area decisions, ADAPs can also receive federal funding via a transfer of federal funding from other Ryan White Program Parts (i.e., Part A, Part B). These transfers include funding from states' Part B "base," Part B supplemental, or metropolitan area Part A awards. In FY2016, these other federal funding contributions to ADAP totaled \$102.8 million.

Federal funding alone does not support the needs of clients seeking services from ADAPs; federal funding for ADAP represents approximately half of the overall ADAP budget. Since their inception, ADAPs have relied upon additional funding support, including state contributions (money appropriated to the state HIV program or ADAPs specifically by state legislatures) and drug rebates (money that is returned to the state as a result of active filing of rebate claims with manufacturers, based on drug purchases). State contributions to ADAPs accounted for \$119.9 million, or 6%, of the overall ADAP budget in FY2016. Drug rebates accounted for \$801.2 million, or 40%, of the overall ADAP budget in FY2016.

THE NATIONAL ADAP BUDGET

FY2016 ADAP budgets ranged from \$796 in the Marshall Islands to approximately \$349 million in New York. By definition, all eligible jurisdictions (59) receive federal ADAP earmark funding based on a formula, but not all ADAPs received funding from other sources, which are often dependent on individual state and local planning, policy, and/or legislative decisions, as well as resource availability. In FY2016, three ADAPs received only federal earmark funding. The breakdown of other sources of funding for ADAPs can be found in the box to the right.

The overall composition of the national ADAP budget has changed since FY1996, the year in which the ADAP earmark began. The federal earmark now maintains a similar proportion of the budget, 26% of the budget in FY1996 to 39% in FY2016. State funding has declined as a proportion of the national ADAP budget (25% in FY1996 and 6% in FY2016) and drug rebates have risen from 6% in FY1996 to 40% in FY2016, and are now the largest source of revenue for ADAPs.

Since FY1996, the first year of the National ADAP Monitoring Project and the year in which highly active antiretroviral therapy (HAART) emerged as the new standard of care, the national ADAP budget from all sources has grown more than ten-fold (a 1,049% increase). The national budget has grown each year since 1996, but generally at slower rates since an initial jump between 1996 and 1997, when the federal appropriation more than tripled. From 1998-2016, the annual rate of increase for the national budget has averaged 9%, even with an overall decrease in FY2016 (6% decrease between FY2015 and FY2016).

SOURCES OF FUNDING

The breakdown of other sources of funding for ADAPs is as follows (among the 50 ADAPs reporting data):

- Part B ADAP Supplemental Treatment Grants: 13 ADAPs received funding
- Part B Base Contribution Allocated to ADAP: 17 ADAPs received funding
- Part B Supplemental Directed to ADAP: 10 ADAPs received funding
- ADAP Emergency Relief Funding: 14 ADAPs received funding
- Part A Contribution Allocated to ADAP: 6 ADAPs received funding
- State Contribution: 28 ADAPs received funding
- Drug Rebates: 38 ADAPs received funding
- Other State/Federal Funds: 20 ADAPs received funding

¹Part B supplemental awards were provided to 15 states that met federal eligibility criteria, applied for funding, and were able to meet the mandated matching requirement or receive a waiver.

Note: 50 Part B programs reported data. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, and Rhode Island did not respond. The total FY2016 budget includes federal, state, and drug rebates. A dash (-) indicates the Part B program did not report data.

² Part B supplemental awards were provided to 15 states that met federal eligibility criteria, applied for funding, and were able to meet the mandated matching requirement or receive a waiver.

Note: 50 Part B programs reported data. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, and Rhode Island did not respond. The total FY2016 budget includes federal, state, and drug rebates. A dash (-) indicates the Part B program did not report data.

 ${}^{\scriptscriptstyle 1}\!Comparison$ Totals are based on only those states that reported data for both time periods.

Note: 50 ADAPs reported data. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, and Rhode Island did not respond. The total FY2016 budget includes federal, state, and drug rebates. Cost recovery funds, with the exception of drug rebates, are not included in the total budget.

¹Part B ADAP Supplemental awards were provided to states that met federal eligibility criteria, applied for funding, and were able to meet the mandated matching requirement or receive a waiver.

Note: 50 ADAPs reported data. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, and Rhode Island did not respond. This table does not include the "Other State or Federal" category (\$68,171,727), which is reported in the total budget in Tables 1 and 2. A dash (-) indicates the ADAP did not report data.

WHAT DOES IT TAKE TO ACHIEVE VIRAL SUPPRESSION?

The Ryan White Program, including ADAP, plays a critical role in efforts to end the HIV epidemic nationally by having a measurable impact on multiple "bars" within the HIV care continuum, most notably linkage to and retention in care and treatment as well as viral load suppression. ADAPs work to reduce new HIV infections, increase access to care and improve health outcomes, and reduce HIV-related disparities and health inequities¹ by ensuring continuous access to life-saving treatment and care for eligible PLWH. ADAPs' support of insurance and direct provision of ARV therapy and other medications to PLWH is necessary in order for clients to achieve optimal health outcomes and viral load suppression.

There is now conclusive scientific evidence that a person living with HIV who is on antiretroviral therapy (ART) and is durably virally suppressed (defined as having a consistent viral load of less than <200 copies/mL) does not sexually transmit HIV. Viral load suppression in turn greatly reduces HIV transmission and rates for new infections. In addition to viral load suppression, improved access to care and treatment is associated with elevations in CD4 count and reductions in PLWH's progression to CDC-defined Stage 3 HIV-infection or AIDS². The National HIV/AIDS Strategy for The United States: Updated to 2020 emphasizes the need for "seamless systems..." such as ADAP, "...to link people to care immediately after diagnosis and support retention in care to achieve viral suppression that can maximize the benefits of early treatment and reduce transmission risk³."

ACHIEVING VIRAL SUPPRESSION

The majority (77%) of all clients served by ADAPs in calendar year (CY) 2015 were reported as virally suppressed, defined as having a viral load that is less than or equal to 200 copies/mL. Data related to viral load suppression were calculated based on the most recent viral load recorded for each client as of December 31, 2015, among those served by the ADAP program in CY2015, (including those clients not on ARV medications, such as those who were enrolled but who may not have received medications). According to the 2015 Ryan White Program client-level data report, 83% of people receiving any service within the Ryan White Program are estimated to be virally suppressed⁴. In contrast, while not all individuals may be receiving a service related to HIV, an unpublished report indicates that 55% of all PLWH nationally are estimated to be virally suppressed⁵.

Overall, nearly 98% of Part B and ADAP budgets are allocated to program services; only 2.2% of Part B and ADAP funding is used to administer the program. ADAP programs bridge client access to medications and comprehensive care. In addition to medication access, which provides a clear benefit to clients, Part B programs

CHART 2 Engagement in Ryan White Part B and ADAP, Calendar Year 2015

Client enrollment The number of clients

enrolled by Part B program or ADAP in 2015

Client utilization

The number of clients served by Part B program or ADAP in 2015

Client retention

The number of clients who were successfully recertified twice in a 12-month period of time by Part B program or ADAP

Part B client health outcome The number of clients served by Part B program or ADAP who reported a suppressed viral load in 2015

Note: 50 ADAPs reported data. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, and Rhode Island did not respond.

have continued to focus on the whole person – what does a client need to best benefit from medication access? While all of the core medical and support services⁶ are integral to the care and treatment of PLWH, each of the following categories provide services related to challenges PLWH face in reaching a positive health outcome, including improving treatment adherence, <u>thus leading</u> to the achievement of viral load suppression:

Mental Health Services:

Mental health has a direct impact on physical health, and the way individuals make choices. Treatment for mental health conditions, including <u>depression</u>, can improve individuals' adherence to medications and overall health outcomes. During CY2015, 36 jurisdictions served one or more Part B program client via Mental Health Services.

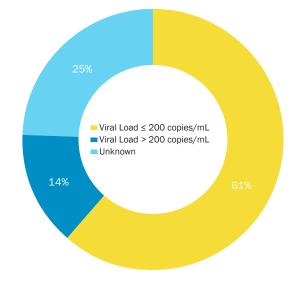

Substance Use Services (Outpatient and Residential Care):

Substance use disproportionately impacts PLWH, posing challenges in terms of <u>the overall effectiveness of their HIV care and treatment</u> as well as their broader health. In addition to deleterious effects on HIV-specific health outcomes, they must also contend with risks of overdose and death from overdose, <u>a common cause of non-AIDS-</u> related death among PLWH. Yet individuals with substance use disorders may not seek treatment for these issues because of inadequate <u>screening</u>, <u>stigma</u>, or a lack of available and adequate services. During CY2015, 18 jurisdictions served one or more Part B program client via Substance Use Services (Outpatient and Residential Care).

FOOTNOTES

- ⁴ The 2014 Ryan White Program client-level data report estimate of client viral suppression is based on the totality of services provided by clients. ADAPs only maintain a subset of the data for an individual client, which is reflected in the difference in viral suppression rates represented in this data.
- ⁵ Rates for viral load suppression across the Ryan White program are available here.
- ⁶ More information and definitions of core medical and support service categories are available here.

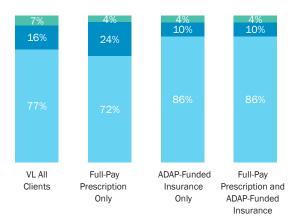

CHART 3 Ryan White Part B Clients Served, by Viral Load, Calendar Year 2015

Note: 46 Part B programs reported data. American Samoa, California, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Oklahoma, Republic of Palau, Rhode Island, and Utah did not respond. Data reflect clients enrolled in Part B programs over the past 12 months or the most recent 12 months for which data are available. Percentages may not total 100% due to rounding.

American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, and Rhode Island did not respond. Data reflect clients enrolled in ADAPs over the past 12 months or the most recent 12 months for which data are available. Percentages may not total 100% due to rounding.

CHART 5 Ryan White Part B/ ADAP Provision of Services for Incarcerated Individuals, Calendar Year 2015

Note: 48 Part B programs/ADAPs reported data. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, Rhode Island, and Utah did not respond. Percentages may not total 100% due to rounding.

Case Management (non-medical):

Over the course of time, most ADAPs require clients to participate in case management to enroll in and be served by ADAP. Case management is an overall form of navigation support for clients to be connected to Ryan White Program and non-Ryan White Program services. Case management assists clients in coordinating care and other related services, assisting clients in accessing all services necessary to ensure they are able to adhere to medications. During CY2015, 29 jurisdictions served one or more Part B program client via Case Management (non-medical).

Food Bank/Home-Delivered Meals; Housing Services; and Medical Transportation Services:

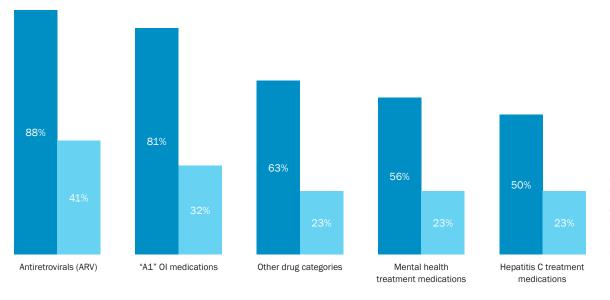

While it has long been experienced anecdotally, the link between insecure food, housing, and transportation services and medication adherence is now being fully researched. Comprehensive access to these service categories has been shown to increase clients' adherence to medications and overall health outcomes. During CY2015, 28 jurisdictions served one or more Part B program client via Food Bank/Home-Delivered Meals; 22 via Housing Services; and 35 via Medical Transportation Services.

Provision of ADAP/Ryan White Part B Services for Recently Incarcerated:

It is acutely important for HIV public health programs to evaluate the structural interventions that could be enacted to address <u>recidivism</u> <u>among PLWH</u>. The potential for re-incarceration is a clear indicator of poor health outcomes among PLWH. Ideally immediately, but within the six months directly following release, PLWH should be enrolled in insurance or provided other access to health care and the services associated with addressing the whole health of the individual. During CY2015, 22 jurisdictions provided Part B or ADAP services for recently incarcerated individuals. Seventeen jurisdictions provided Part B or ADAP services for currently incarcerated individuals.

CHART 6 Top Ryan White Part B/ADAP Services Provided to Incarcerated Individuals, Calendar Year 2015

Currently Incarcerated Recently Incarcerated

Note: 46 Part B programs reported data. American Samoa, California, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Nevada, Northern Mariana Islands, Republic of Palau, Rhode Island, Texas, Utah, and Vermont did not respond. A dash (--) indicates the Part B program did not report data.

¹ This table represents Part B program expenditures in 2015. Only expenditure categories requested in the National ADAP Monitoring Survey are represented in this table.

² For some states, enrolled clients reported may be a snapshot in time rather than a cumulative unduplicated client count. In this instance, some Part B may report a higher number of clients served throughout the year compared to the number of clients enrolled in the program at the end of the year.

¹ This table represents Part B program expenditures in 2015. Only expenditure categories requested in the National ADAP Monitoring Survey are represented in this table.

This table reports in the program expenditure in even only expenditure categorized expension and the national Abar monitoring out to be consistent on this table. For some states, enrolled clients reported may be a snapshot in time rather than a cumulative unduplicated client count. In this instance, some Part B may report a higher number of clients served throughout the year compared to the number of clients enrolled in the program at the end of the year.

Utilization², 2015 (Continued)

¹This table represents Part B program expenditures in 2015. Only expenditure categories requested in the National ADAP Monitoring Survey are represented in this table.

Note: 45 Part B programs reported data. American Samoa, Colorado, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Nevada, Northern Mariana Islands, Republic of Palau, Rhode Island, Texas, Utah, and Vermont did not respond. A dash (–) indicates the Part B program did not report data.

¹This table represents ADAP program expenditures in calendar year 2015 (January 1, 2015-December 31, 2015). Only expenditure categories requested in the National ADAP Monitoring Survey are represented in this table.

²This category may include HIV disease monitoring laboratory assays paid with ADAP funds as authorized under the HRSA flexibility policy.

³ "Other" includes, but is not limited to, contract services to dispense medications, determine eligibility, and manage enrollment; pharmacy charges, dispensing and shipping fees, central pharmacy fees; as well as medical, dental, lab, and nutritional services. Federal ADAP funds may not be used to pay for medical, dental, lab, and nutritional services.

COMPREHENSIVE CARE FOR PEOPLE LIVING WITH HIV

THE EVOLUTION OF INSURANCE PURCHASING

As clarification from HRSA became available, ADAPs began purchasing insurance for clients in 2002. In FY2009, 43 ADAPs reported using funds for insurance purchasing/continuation, representing \$161.8 million in estimated expenditures (10% of the ADAP budget at that time) for 30,621 ADAP clients, with an average cost per client of \$5,284. In March 2010, President Obama signed into law the Patient Protection and Affordable Care Act (Affordable Care Act, ACA). The progression of health reform has enhanced health coverage to many uninsured persons living with HIV. In CY2015, 47 ADAPs reported using funds for insurance purchasing, representing \$337.6 million in actual expenditures (17% of the ADAP budget) for 124,099 ADAP clients (55%), with an average cost per client of \$2,720.

The ACA revolutionized how ADAPs and Part B programs could engage in insurance purchase and maintenance for clients. Because of this increased engagement, and, generally, access to more options for coverage for clients, the cost of purchasing insurance for clients was reduced; ADAPs no longer had to rely on high-risk insurance pools or other high-cost plans for their clients. As a result, national ADAP enrollment has shifted dramatically and continues to trend toward greater numbers of insured clients in the program. This shift in coverage is discussed in greater detail in Section Four.

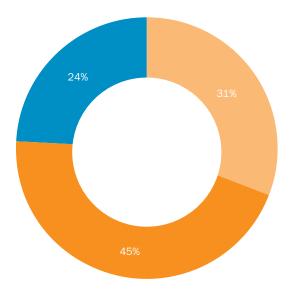

THE IMPLEMENTATIO REFORM AND COST-S

CHART 12 ADAP Clients Served, by Program Type, Calendar Year 2015

- ADAP clients served by ADAP-funded insurance program only
- ADAP clients served by full-pay prescription program only

Note: 50 ADAPs reported data. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, and Rhode Island did not respond. Percentages may not total 100% due to rounding.

HEALTH REFORM

Health reform throughout the U.S. has been implemented unequally across states, creating new disparities and illuminating further stressors on the public health system. Medicaid expansion under the ACA allows states to extend eligibility to individuals with income up to 138% FPL regardless of traditional Medicaid categories of eligibility, such as disability and pregnancy⁷. Marketplaces, created under the ACA, utilize outreach and enrollment staff and streamlined application processes that screen for Medicaid eligibility and eligibility for premium tax credits and cost-sharing reductions for Qualified Health Plans (OHPs). ADAPs have assisted tens of thousands of individuals with the premiums and other cost sharing associated with QHP coverage. Disparities continue to exist among states that have and have not expanded Medicaid. As of February 2017. 31 states and the District of Columbia had expanded Medicaid; almost half of all ADAP clients reside in the 19 states that have not expanded Medicaid. Those states are primarily in the southern region, further illuminating inequities in access to care and treatment via public payers. The majority (58%) of clients served by ADAP in June 2015 had incomes below 138% of the Federal Poverty Level (FPL).

FOOTNOTES

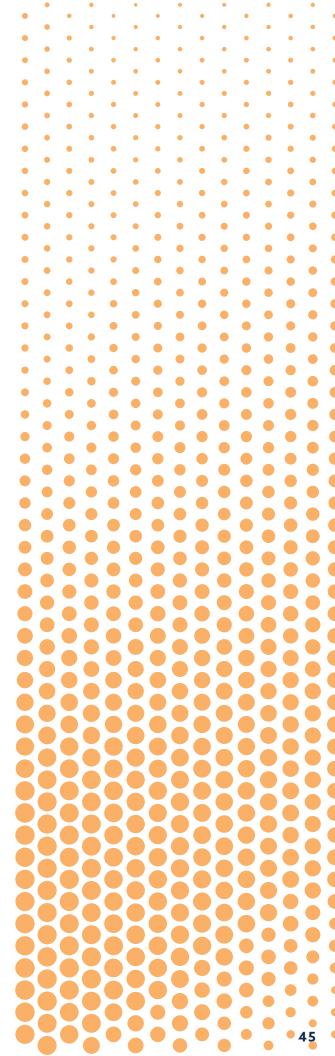

- ⁷ In 2014, the ACA expanded Medicaid eligibility to most people with income up to 133% of the federal poverty level (FPL). However, in addition to new income accounting rules for most Medicaid populations (called "Modified Adjusted Gross Income"), there is an additional 5% disregard of income in calculating eligibility, effectively bumping the Medicaid income eligibility threshold to 138% FPL.
- ⁸ Federal ADAP funds cannot be used to pay for medical co-payments/ co-insurance. Part B or state funding are used for these purposes.

N OF HEALTH HARING

As our nation's health care system and public health programs continue to grow and change, ADAPs themselves have undergone and continue to experience significant transformations in their structure and service provision to ensure access to care and treatment for PLWH. This includes assisting clients in accessing new forms of medications and medical coverage as well as maintaining vital services that strengthen those available through the Ryan White Program. ADAPs' nimble and progressive approach has positioned the program as a sustainable model for optimizing health outcomes for the clients ADAPs serve and as a critical component of the broader health system.

COST-SHARING

ADAP remains the primary payer for those individuals whose insurance cost-sharing responsibilities (e.g., premium, deductible, and co-payment/co-insurance) are a barrier to purchasing and maintaining insurance. While the ACA includes an unprecedented expansion in access to both private and public health insurance, the cost of insurance often remains too high for many individuals, even with the availability of federal subsidies. The Ryan White Program allows states to use ADAP funds to purchase health insurance and pay insurance premiums, co-payments and/or deductibles for individuals eligible for ADAP, provided the insurance has comparable formulary benefits to that of the ADAP and is costeffective to the ADAP. By purchasing and continuing insurance on behalf of clients. ADAPs have ensured access to treatment and care services beyond the scope of the traditional Ryan White Program. Today, the majority of ADAPs pay premiums (84%), deductibles (84%) and prescription co-payments/co-insurance (94%) on behalf of eligible clients. Half of ADAPs also pay medical co-payments/co-insurance8 on behalf of clients. With a significantly lower average cost per client (\$2,720) relative to full-pay prescriptions (\$8,663), insurance continuation continues to be cost- effective for ADAPs.

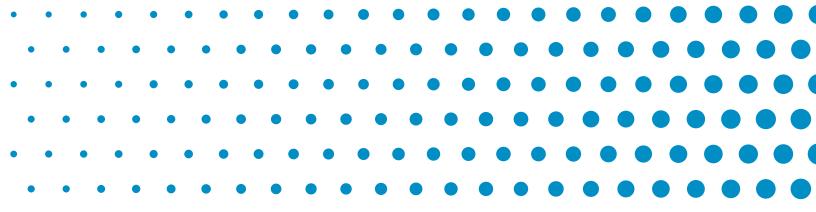

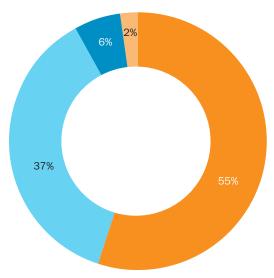

CHART 15 ADAP clients served, by ACA Marketplace type

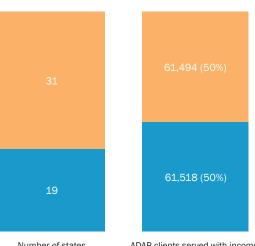

- Federally-facilitated Marketplace
- State-based Marketplace
- State-federal partnership Marketplace
- Federally-supported, state-based Marketplace

Forty-seven ADAPs reported using funds for insurance purchasing/ continuation in 2015 representing \$338 million in expenditures in CY2015. In CY2015, 124,099 ADAP clients were covered by ADAP insurance coordination.

Some private insurance plans (Qualified Health Plans, employersponsored plans, and other individual health plans) place HIV ARVs on a higher tier than other medications, resulting in high costsharing for clients. In many cases, when medications are placed on high or specialty tiers, instead of charging a co-payment with a fixed dollar amount, plans will charge a co-insurance, or a percentage of the cost of the drug. This results in much higher cost-sharing responsibilities for clients. To ensure continuous access to treatment, ADAPs purchase or continue insurance by paying for prescription co-payments or co-insurance on behalf of clients, closely interacting with other existing payer sources with ADAP serving as the payor of last resort.

CHART 13 ADAP Clients Served, by State Medicaid Expansion, Calendar Year 2015

Non-Medicaid expansion states — Medicaid expansion states

Note: 50 ADAPs reported data. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, and Rhode Island did not respond. Percentages may not total 100% due to rounding.

Number of states

ADAP clients served with income less than or equal to 138% of FPL

CHART 14 ADAP Clients Served and Estimated Expenditures in Insurance Purchasing and Continuation, 2016¹

Premiums only Deductible/co-payments/co-insurance only Premiums and deuctible/co-payments-co-insurance Expenditures

¹Prior to 2014, ADAPs reported the number of clients served by insurance purchasing for a single month, June. Beginning 2015, the number of clients served by insurance purchasing is for the entire calendar year (January 1 - December 31, 2015).

Note: 50 ADAPs reported data. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, and Rhode Island did not respond. Health insurance programs include purchasing health insurance and paying insurance premiums, co-payments, and/or deductibles. Client data for 2002 and 2003 represent clients enrolled; 2004-2015 data represent clients served. All ADAPs that have reported having insurance purchasing/maintenance programs since 2002 are included.

¹ For the purposes of this report, ADAP clients are considered to be enrolled in either the full-pay medication program or the insurance program. Full-pay medication program clients are defined as those individuals who receive medications paid in full by ADAP with no coordination of insurance or benefits. Insurance program clients are defined as those who have additional coverage (i.e., insurance, Medicare) that ADAP is assisting through paying premiums, deductibles, or co-payments/co-insurance.

² Individuals who had an insurance (i.e., Medicare Part D, Medicaid, private insurance) payment (premium, co-payment/co-insurance, and/or deductible) paid on their behalf using ADAP funds, either fully or in part.

³ This includes clients who enrolled in an insurance plan mid-year and those who were enrolled in an insurance plan that did not cover one or more medically necessary medications such that the ADAP's full-pay prescription program did instead.

Note: 50 Part B programs reported data. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, and Rhode Island did not respond. A dash (--) indicates the ADAP did not report data.

SECTION

FOUR

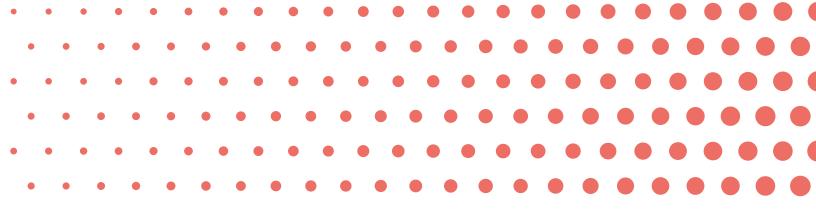

WHO BENEFITS FROM SERVICES?

ADAP CLIENT UTILIZATION

The Ryan White Program, and ADAPs, provide services for PLWH who are uninsured or under-insured. Individual states set specific eligibility criteria for their programs, depending on state rules, available funding, and client need.

In CY2015, there were 257,396 clients enrolled in ADAPs across the country, a 181% increase in enrollment over the last 10 years. Enrollment varies by state and is concentrated in certain areas—ten states accounted for two-thirds of total enrollment. In general, these states represent those with the highest numbers of PLWH, and the concentration of clients within these states largely reflects the allocation of Ryan White Program funding to states.

Each year, more clients are typically enrolled in ADAPs than seek access to services; in CY2015, 87% of clients enrolled received an ADAP service. This is because clients may seek ADAP services at different times of the year, depending on their clinical needs, length of prescriptions, availability of other resources for obtaining prescription drugs, annual and bi-annual recertification, and other factors. Some individuals cycle on and off ADAP throughout the year, particularly those with Medicaid or Medicare Part D coverage. Medicaid beneficiaries may face limits in their coverage in some states and/or are in the Medicaid spend-down process. Medicare Part D beneficiaries may not use ADAP until they reach the coverage gap (the point

in time when Medicare Part D beneficiaries are responsible for all their drug costs), necessitating a return to ADAP.

ADAPs provided medications to 225,517 clients in CY2015, a 235% increase in utilization over the last 10 years. The number of clients served varies considerably by state, ranging from 137 in Alaska to more than 29,000 in California. Similar to the number of clients enrolled, ten states accounted for two-thirds (63%) of all ADAP clients served in CY2015, with four states accounting for almost half (41%) of clients served. In addition to providing medications in CY2015, 124,099 clients benefited from ADAP funds through some form of insurance coverage payment (some of whom may have also received medications).

A SNAPSHOT OF ADAP CLIENTS

African Americans and Hispanics represented 61% (38% and 23%, respectively) of clients served in CY2015 (compared to 40% and 21%, respectively, of PLWH in the United States at the end of 2013^{9,10}; white non-Hispanics represented 31% and Asian, Native Hawaiian/Pacific Islanders and American Indians/Alaskan Natives combined represented approximately 3%. Individuals identifying as multi-racial represented approximately 4% of clients served. The race/ethnicity breakdown of ADAP clients varies by state but national ADAP client demographics have remained fairly constant over the course of the National ADAP Monitoring Project, despite changes in demographics of the epidemic within the U.S.

Most ADAP clients are male (78% of those served in CY2015; compared to 76% of PLWH in the United States at the end of 2013¹¹); approximately one-fifth (21%) are female (compared to 23% of PLWH in the United States at the end of 2013¹²). One percent of clients served in CY2015 self-identified as transgender. The majority of ADAP clients served are between the ages of 45 and 64 (50%),

followed by those between the ages of 25 and 44 years (40%). While the gender breakdown of clients has remained steady over time, increasingly ADAPs are serving an older client population.

More than seven in ten ADAP clients are low-income – 76% served in CY2015 were at or below 200% of the Federal Poverty Level (FPL), including more than half (58%) at or below 138% of FPL (in 2015, the FPL was \$11,770 – slightly higher in Alaska and Hawaii – for a household of one). These figures are consistent with data reported in previous periods.

There is no minimum ADAP income eligibility threshold set by the federal government, although clients are required to be low-income and must have limited or no insurance coverage. ADAP decisions on their individual program income eligibility level reflect budget conditions within a state and the size of the population living with HIV needing services. As a result of these factors, income eligibility levels for ADAPs vary widely across the country, ranging from a low of 200% FPL in four states (Idaho, Iowa, Puerto Rico, Texas) to 500% FPL or more in ten states (Colorado, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Jersey, Pennsylvania, South Carolina, Vermont, and Wyoming).

In addition to income eligibility criteria, many ADAPs use other criteria for eligibility. All ADAP enrollees must be residents of the state in which they are seeking medication, and some ADAPs require documentation of residency. Three ADAPs reported using asset limit criteria and 30 ADAPs report requiring on-going or as needed case management.

Note: 50 ADAPs reported data. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, and Rhode Island did not respond. A dash (–) indicates the ADAP did not report data. A zero (0%) indicates the ADAP responded zero (0%) to the question.

¹ In 2015, the ACA expands Medicaid eligibility to most people with income up to 133% of the federal poverty level (FPL). However, in addition to new income counting rules for most Medicaid populations (called "Modified Adjusted Gross Income"), there is an additional 5% disregard of income, effectively bumping the Medicaid income eligibility threshold to 138% FPL.

Note: 50 ADAPs reported data. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, and Rhode Island did not respond. A dash (--) indicates the ADAP did not report data. A zero (0%) indicates the ADAP responded zero (0%) to the question. The 2015 Federal Poverty Level (FPL) was \$11,770 (slightly higher in Alaska and Hawaii) for a household of one.

¹ Reported using the most recent viral load recorded for each client as of December 31, 2015 among those served by the Part B program in calendar year 2015 (including those clients on ARVs and those clients not on ARVs). If a client did not receive a viral load during calendar year 2015, reported based on the last viral load recorded for that individual prior to December 31, 2015. Note: 46 Part B programs reported data. American Samoa, California, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Oklahoma, Republic of Palau, Rhode Island, and Utah di not respond. Data reflect clients enrolled in Part B programs over the past 12 months or the most recent 12 months for which data are available. A dash (--) indicates the Part B program did not report data. A zero (0%) indicates the Part B program responded zero (0%) to the question.

¹ Reported using the most recent viral load recorded for each client as of December 31, 2015 among those served by the ADAP program in calendar year 2015 (including those clients on ARVs and those clients not on ARVs). If a client did not receive a viral load during calendar year 2015, reported based on the last viral load recorded for that individual prior to December 31, 2015. ² Individuals who had an insurance (i.e., Medicare Part D, Medicaid, private insurance) payment (premium, co-payment/co-insurance, and/or deductible) paid on their behalf using ADAP funds, either fully or in part.

³ This includes clients who enrolled in an insurance plan mid-year and those who were enrolled in an insurance plan that did not cover one or more medically necessary medications such that the ADAP's full-pay prescription program did instead.

Note: 50 ADAPs reported data. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, and Rhode Island did not respond. A dash (–) indicates the ADAP did not report data. Data reflect clients enrolled in ADAPs over the past 12 months or the most recent 12 months for which data are available. A dash (–) indicates the ADAP did not report data. A zero (0%) indicates the ADAP responded zero (0%) to the question. In some cases, an ADAP was able to report data though was unable to distinguish between clients served by the full-pay medications program only, the ADAP-funded insurance program only, and the full-pay medications and ADAP-funded insurance programs. Note: Many ADAPs were unable to report Viral Load separately for: clients served by a full-pay prescription program only; clients served by an ADAP-funded insurance program only; and clients served by a full-pay prescription program and ADAP-funded insurance program. As such, the percentage of clients that fall into each Viral Load category are reported under "All Clients Served" for each state for which this is the case.

Note: 22 ADAPs reported data. Alaska, American Samoa, Arkansas, Colorado, Connecticut, Delaware, District of Columbia, Federated States of Micronesia, Florida, Guam, Idaho, Kansas, Kentucky, Marshall Islands, Minnesota, Nevada, New Hampshire, New Jersey, New York, North Carolina, Northern Mariana Islands, Pennsylvania, Republic of Palau, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virgin Islands (U.S.), Washington, West Virginia, and Wisconsin did not respond. A dash (–) indicates the ADAP did not report data. Data reflect clients enrolled in ADAPs over the past 12 months or the most recent 12 months for which data are available. A dash (–) indicates the ADAP did not report data. A zero (0%) indicates the ADAP responded zero (0%) to the question.

¹ In 2015, the ACA expands Medicaid eligibility to most people with income up to 133% of the federal poverty level (FPL). However, in addition to new income counting rules for most Medicaid populations (called "Modified Adjusted Gross Income"), there is an additional 5% disregard of income, effectively bumping the Medicaid income eligibility threshold to 138% FPL. ²In Maine, Core Medical Services include Medical Case Management (500% FPL) and financial assistance with Oral Health Care (300% FPL).

³In Minnesota, Support Services are capped at 300% FPL with the exception of benefits counseling. Income eligibility for benefits counseling is 400% FPL.

Note: 49 Ryan White Part B programs and 49 ADAPs reported data. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, Rhode Island, and Utah did not respond. A dash (--) indicates the ADAP did not report data. The 2015 Federal Poverty Level (FPL) was \$11,770 (slightly higher in Alaska and Hawaii) for a household of one.

TABLE 25 ADAP Client Eligibility Requirements¹, as of January 1,

	ASSET	LIMITS	STATE RESIDENC

Direct Purchase states - ADAPs using this model centrally purchase and dispense medications through their own pharmacy or a single contract pharmacy service provider.

Rebate states – These are ADAPs who pay retail pharmacies a pre-determined amount at the point of sale for drugs dispensed to ADAP clients. ADAP then bills drug manufacturers for the 340b Unit Rebate amount for the number of units dispensed.

Hybrid states – A direct purchase state that utilizes an existing entity (e.g., University Hospital) to purchase and distribute ADAP drugs. The entity maintains a single drug inventory purchased at 340B prices. To secure the additional supplemental discounts negotiated by the ADAP Crisis Task Force, these ADAPs must submit rebate claims for the supplemental discount amount. Dual Purchaser – ADAPs that purchase and dispense medications through their own pharmacy or a single contract pharmacy service provider AND pay retail pharmacies for some clients and file rebate claims including partial pay claims.

340B Drug Pricing Program – requires drug manufacturers to provide outpatient drugs to eligible health care organizations for eligible patients at significantly reduced prices. The 340B program is designed to provide a pricing benefit to safety-net providers. The 340B program is administered by the Office of Pharmacy Affairs. HRSA Prime Vendor Program – Participants in the 340B Program may also participate in the 340B Prime Vendor Program. A "prime vendor" is an entity that negotiates with manufacturers on behalf of a group of drug purchasers, in order to obtain reduced drug prices. HRSA has chosen a prime vendor to negotiate additional discounts (i.e., lower than the 340B ceiling price or sub-340B ceiling price) for participants, including ADAPs.

Note: 49 ADAPs reported data. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, Rhode Island, and Utah did not respond. A dash (--) indicates the ADAP did not report data.

TABLE 30 HIV/AIDS Antiretroviral and Opportunistic Infection Medications

FDA-APPROVED ANTIRETROV	IRAL MEDICATIONS
GENERIC NAME	BRAND NAME
CYP34A INHIBITORS (PHARMOCOKINETIC BOOSTERS)	
cobicistat	Tybost
MULTI-CLASS COMBINATION PRODUCTS	
cobicistat, elvitegravir, emtricitabine, tenofovir alafenamide cobicistat, elvitegravir, emtricitabine, and tenofovir disoproxil fumarate efavirenz, emtricitabine, and tenoforvir disoproxil fumarate emtricitabine, rilpivirine, and tenoforvir alafenamide emtricitabine, rilpivirine, and tenoforvir disoproxil fumarate	Genvoya Stribild Atripla Odefsey Complera
NRTIS	
abacavir sulfate, ABC abacavir, zidovudine, and lamivudine abacavir and lamivudine didanosine, dideoxyinosine, ddL emtricitabine, FTC lamivudine and zidovudine lamivudine, 3TC stavudine, 3TC stavudine, d4T tenofovir, disoproxil fumarate, TDF tenofovir disoproxil fumarate and emtricitabine zidovudine, azidothymidine, AZT, ZDV	Ziagen Trizivir Epzicom Videx Emtriva Combivir Epivir Zerit Viread Truvada Retrovir
NNRTIS	
delavirdine, DLV efavirenz, EFV etravirine nevirapine, NVP rilpivirine	Rescriptor Sustiva Intelence Viramune Edurant
PROTEASE INHIBITORS	
amprenavir, APV atazanavir sulfate, ATV darunavir fosamprenavir calcium, FOS-APV indinavir, IDV lopinavir and ritonavir, LPV/RTV nelfinavir mesylate, NFV ritonavir, RTV saquinavir mesylate, SQV tipranavir, TPV	Agenerase ¹ Reyataz Prezista Lexiva Crixivan Kaletra Viracept Norvir Invirase Aptivus
PROTEASE INHIBITOR AND CYP34A INHIBITOR (PHARMOCOKINETIC BOOSTER) COMBIN	ATIONS
atazanavir, cobicistat darunavir/cobicistat	Evotaz Prezcobix
FUSION INHIBITORS	
enfuvirtide, T-20	Fuzeon
ENTRY INHIBITORS - CCR5 CO-RECEPTOR ANTAGONIST	
maraviroc	Selzentry
HIV INTEGRASE STRAND TRANSFER INHIBITORS	
dolutegravir elvitegravir raltegravir	Tivicay Vitekta Isentress
HIV INTEGRASE STRAND TRANSFER INHIBITOR AND NRTI COMBINATIONS	
abacavir/lamivudine, dolutegravir	Triumeq

¹The manufacturer of Agenerase (amprenavir) discontinued the sale and distribution of the drug in capsule form, used for adult dosing, after 2004 and is instead manufacturing fosamprenavir (Lexiva), a "prodrug" of Agenerase (a prodrug is an inactive precursor of a drug, converted into its active form in the body). Agenerase is still availabe in pediatric dosing.

MEDICAID VS. NON-MEDICAID EXPANSION

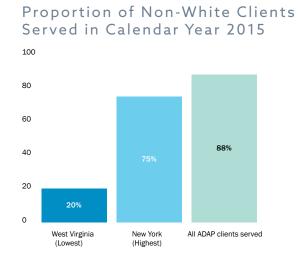

TOTAL ADAP BUDGET, FY2016

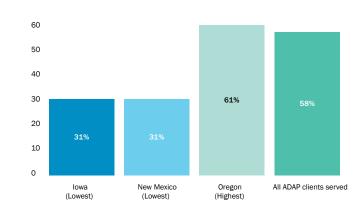

Total ADAP budgets range from

\$2.5 MILLION (New Hampshire) to \$348.9 MILLION (New York)

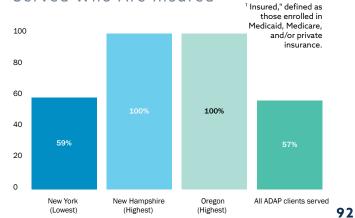

DEMOGRAPHICS

Proportion of Clients Served with Incomes ≤138% FPL

Proportion of ADAP Clients Served Who Are Insured¹

RYAN WHITE PART B AND ADAP PARTNERSHIP **TO BOLSTER HEALTH OUTCOMES**

IMPACT OF ALLOWABLE RYAN WHITE PART B SERVICES

States' Provision of Services Addressing Disparity in Calendar Year 2015:

states served clients in all SEVEN categories (Arizona, Colorado)

Rico, Washington, and Wisconsin)

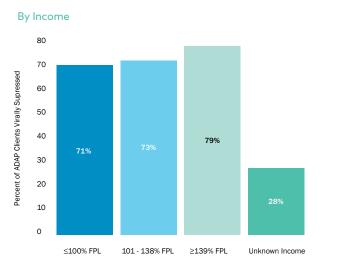

states served clients in FOUR categories (Hawaii, Missouri, Oregon, Tennessee, and South Dakota)

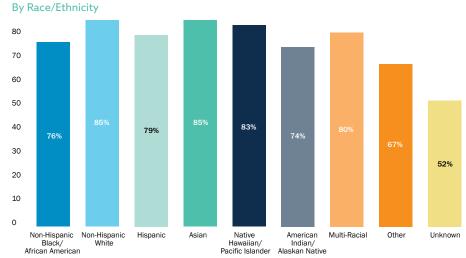

states served clients in SIX categories (Alaska, Arkansas, Florida, Georgia, Illinois, Iowa, Louisiana, Michigan, New Mexico, North Carolina, South Carolina, Virginia, and West Virginia)

States' overarching system of HIV care includes Ryan White Part B programs and ADAPs. They affect change in health disparities by providing services that are responsive to the systemic challenges that disempowered populations (e.g., Non-White, lowincome) experience. With finite resources, Ryan White Part B programs and ADAPs work in concert to target and tailor services to best meet the needs of these clients and to diminish inequitable rates of viral load suppression.

SNAPSHOT OF ADAP CLIENTS' VIRAL LOADS BY INCOME AND RACE/ETHNICITY

NASTAD considers the following as key Ryan White Part B services that impact structural oppression and improve rates of viral load suppression.

CASE MANAGEMENT (NON-MEDICAL):

Non-medical case management supports clients in navigating Ryan White program and non-Ryan White program services essential to clients and associated with structural barriers.

FOOD BANK/

HOME DELIVERED MEALS: Food security is associated with improved HIV health outcomes, including viral load suppression.

HOUSING SERVICES:

In addition to insecure food and transportation, housing impacts HIV health outcomes.

MEDICAL TRANSPORTATION SERVICES:

In addition to insecure food and housing, transportation impacts HIV health outcomes.

MENTAL HEALTH SERVICES:

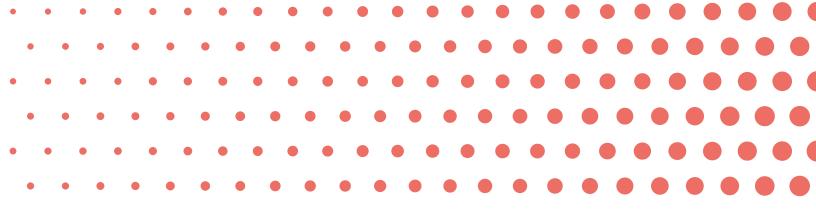

Mental health issues, including depression, affect medication adherence, particularly among Black/African American people living with HIV (PLWH).

PROVISION OF ADAP/RYAN WHITE PART B SERVICES FOR **CURRENTLY/RECENTLY**

INCARCERATED: HIV prevalence is higher among individuals incarcerated in state prisons than the national population. As well, 95% of current state prisoners will be released into the community. Experiences of incarceration and homelessness impede viral load suppression.

SUBSTANCE USE (OUTPATIENT **AND RESIDENTIAL):**

Substance use disproportionately impacts PLWH and impacts the overall effectiveness of HIV treatment.

ACKNOWLEDGEMENTS

NASTAD thanks state ADAP and AIDS program managers and staff for their time and effort in completing the National ADAP Survey which serves as the foundation for this report, and for providing ongoing updates to inform the National ADAP Monitoring Project.

The National ADAP Monitoring Project is one component of NASTAD's National ADAP Monitoring and Technical Assistance Program which provides ongoing technical assistance to all state and territorial ADAPs. The program also serves as a resource center, providing timely information on the status of ADAPs, particularly those experiencing resource constraints or other challenges, to national coalitions and organizations, policy makers, industry members, and state and federal government agencies. NASTAD received support for the National ADAP Monitoring and Technical Assistance Program in 2016 from AbbVie, Gilead Sciences, Janssen Therapeutics, and ViiV Healthcare. NASTAD also receives funding to provide technical assistance to ADAPs through a Training and Technical Assistance Cooperative Agreement with the Health Resources and Services Administration (HRSA).

Amanda Bowes, Ann Lefert and Britten Pund are the contributing authors and editors of this document.

Murray C. Penner, Executive Director DeAnn Gruber, Louisiana, Chair May 2017

METHODOLOGY

Since 1996, NASTAD's National ADAP Monitoring Project has surveyed all jurisdictions receiving federal ADAP earmark funding through the Ryan White Program. In FY2016, 59 jurisdictions received earmark funding and were surveyed; 50 responded. American Samoa, Connecticut, Federated States of Micronesia, Guam, Kentucky, Marshall Islands, Northern Mariana Islands, Republic of Palau, and Rhode Island did not respond. This 22nd release of the *Annual Report* updates prior findings with data from calendar year 2015 and ADAP's fiscal year 2015. The *Annual Report* reflects the latest available data and discusses recent policy and programmatic changes affecting ADAPs. After the survey is distributed, NASTAD conducts extensive follow-up to ensure completion by as many ADAPs as possible.

All data reflect the status of ADAPs as reported by survey respondents. It is important to note that some program information may have changed between data collection and the *Annual Report's* release. Due to differences in data collection and availability across ADAPs, some are not able to respond to all survey questions. Where trend data are presented, only states that provided data in relevant periods are included. In some cases, ADAPs have provided revised program data from prior years and these revised data are incorporated where possible. Therefore, data from prior year reports may not be comparable for assessing trends. Data exceptions specific to a particular jurisdiction are provided in the notes section on relevant charts and tables.
